

Class Set – Activity Sheet

Webmastering

Student Activity Sheet

Link to Your Dream Car

In this assignment, you will create a web page about your dream car, including several types of links within that page.

Assignment

1. Create a web page using notepad about your favorite dream car.
2. Within this web page you will demonstrate the use of the following links:
 - External link – a link that takes you outside your web site to another web site.
 - Anchor – a link that takes you to another place on the same page of a web page.
3. You will also demonstrate in your web page the use of making links change to different colors according to what activity has happened. (Example: a link will be navy blue, a visited link will be light blue and an active link will be purple.) Use these color guidelines for links within your web page.
4. **Refer to the evaluation rubric while creating your web page so that all criteria will be met.** Link Color Examples:
 - Links will be navy blue: [links](#)
 - Visited links will be light blue: [visited links](#)
 - Active links will be purple: [active links](#)
5. Save to your daily work folder as ***dreamcar.html***
